

## Enrolment process guide and Commitment to HE programme applicants

We will offer every applicant to our Higher Education program the opportunity to visit our facility and to meet with the relevant tutor face to face and find out more about the programme as well as the full range of other activities delivered by the organisation. The reason we offer every applicant this opportunity (and not just short-listed candidates) is due to the focus of our organisation being on widening access to our relevant industries.

To further negate barriers to access, we also operate an extremely flexible approach to entry requirement where the focus is on you the individual and your potential, rather than setting arbitrary grades which must be achieved in previous learning as this can also present barriers to access.

Meeting every applicant face to face allows us to implement our flexible approach to course access whilst also providing each applicant a friendly point of entry to our organisation where you can ask any questions you may have about our programmes.
